

Technology is what you make it and we make it good.

- ✓ Best-In-Class SaaS Technology
- ✓ Highly Secure Environment
- ✓ Robust Features and Capabilities
- ✓ Easily Integrates with any System

TECHNOLOGY SOLUTIONS

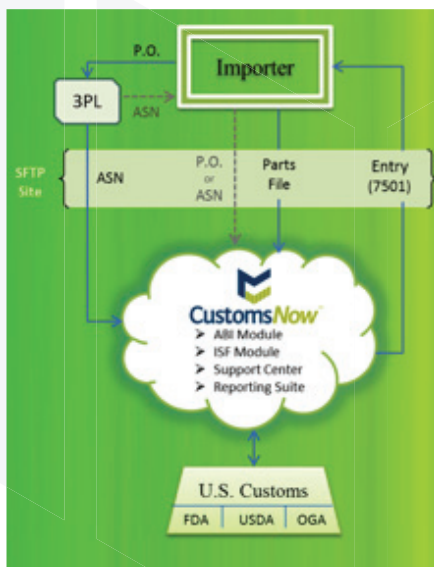

Support ▲ Speed ▲ Technology ▲ Value ▲ 99.9% Uptime

CustomsNowTM offers innovative U.S. Customs ABI solutions using a SaaS-based platform, which provides best-in-class technology, a highly secure environment, and robust features and capabilities. Best of all, it is easily integrated with importers' ERP, GTM and similar systems. This type of technology solution minimizes the dependency and impact on your IT department and gives a quick ROI. In addition, there are no capital asset requisition forms to get approved, no hardware costs and no software or maintenance costs.

- 99.99% uptime guaranteed

SaaS (Software as a Service)

Our system is delivered via the SaaS model, which leverages the power of your computer for transaction processing -- without the slowness typically associated with a purely "web-based" system. And with SaaS, system updates are delivered automatically via the internet.

LaunchPad – Installation is a breeze

CustomsNow's LaunchPad is a simple user download that installs an icon on the user's desktop to interact with the program. No admin rights, no user access control issues, no browser exceptions or IT involvement needed to install and begin using right away.

The **CustomsNowTM** system maximizes the efficiency of a direct filing program with a highly automated entry process that uses your existing electronic data. CustomsNowTM is also currently integrated with several 3rd party applications including those used for freight forwarding, accounting, dispatch and global trade management. Our strong trade knowledge and hosted platform provide maximum quality, efficiency and ROI while eliminating the need for additional resources.
